### **DETAILED ACTION**

1. This application is responsive to application number (10535302) filed on July 10, 2006. Claims 1-9 are pending and have been examined.

### ***Information Disclosure Statement***

2. Acknowledgement is made of applicant's information disclosure statement.

### ***Claim Rejections - 35 USC § 102***

3. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

4. Claims 1, 8, and 9 rejected under 35 U.S.C. 102(b) as being anticipated by Pochmuller (US 2002/0113415).

As per **claim 1**, Pochmuller discloses a device for monitoring the exterior of a motor vehicle, comprising at least one camera, wherein the camera is disposed in the region of a pivot axis of a rear window wiper of the motor vehicle (Fig 1; paragraph [0028]; the claim limitations states that the camera is in the region of a pivot axis, but does not state how big this region is and therefore is broad by the Examiner's understanding of the case).

Regarding **claim 8**, arguments analogous to those presented for claim 1 are applicable for **claim 8**.

Regarding **claim 9**, arguments analogous to those presented for claim 1 are applicable for claim 9.

### ***Claim Rejections - 35 USC § 103***

5. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

6. The factual inquiries set forth in *Graham v. John Deere Co.*, 383 U.S. 1, 148 USPQ 459 (1966), that are applied for establishing a background for determining obviousness under 35 U.S.C. 103(a) are summarized as follows:

1. Determining the scope and contents of the prior art.
2. Ascertaining the differences between the prior art and the claims at issue.
3. Resolving the level of ordinary skill in the pertinent art.
4. Considering objective evidence present in the application indicating obviousness or nonobviousness.

7. Claim 7 rejected under 35 U.S.C. 103(a) as being unpatentable over Pochmuller (US 2002/0113415) in view of well-knowledge.

As per **claim 7**, the device according to claim 1 wherein the camera (11) is a panorama camera with a 360 degree range of vision (The use of a panoramic camera on a vehicle for vehicle surveillance is not novel and is well-known in the art).

Official Notice is taken.

***Allowable Subject Matter***

1. Claims 2-6 objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.
